The law’s Ultimate Frontier: Towards an Ecological Jurisprudence: A Global Horizon in Private International Law

This important book offers an ambitious and interdisciplinary vision of how private international law (or the conflict of laws) might serve as a heuristic for re-working our general understandings of legality in directions that respond to ever-deepening global ecological crises. Unusual in legal scholarship, the author borrows (in bricolage mode) from the work of Bruno Latour, alongside indigenous cosmologies, extinction theories and Levinassian phenomenology, to demonstrate why this field's specific frontier location at the outpost of the law – where it is viewed from the outside as obscure and from the inside as a self-contained normative world – generates its potential power to transform law generally and globally. Combining pragmatic and pluralist theory with an excavation of ‘shadow’ ecological dimensions of law, the author, a recognised authority within the field as conventionally understood, offers a truly global view.

The Crown and the Courts: Separation of Powers in the Early Jewish Imagination

The separation of powers is a bedrock of modern constitutionalism, but striking antecedents were developed centuries earlier, by Jewish scholars and rabbis of antiquity. Attending carefully to their seminal works and the historical milieu, David Flatto shows how a foundation of democratic rule was contemplated and justified long before liberal democracy was born.

During the formative Second Temple and early rabbinic eras (the fourth century BCE to the third century CE), Jewish thinkers had to confront the nature of legal authority from the standpoint of the disempowered. Jews struggled against the idea that a legal authority stemming from God could reside in the hands of an imperious ruler (even a hypothetical Judaic monarch). Instead scholars and rabbis argued that such authority lay with independent courts and the law itself. Over time, they proposed various permutations of this ideal. Many of these envisioned distinct juridical and political powers, with a supreme law demarcating the respective jurisdictions of each sphere. Flatto explores key Second Temple and rabbinic writings—the Qumran scrolls; the philosophy and history of Philo and Josephus; the Mishnah, Tosefta, Midrash, and Talmud—to uncover these transformative notions of governance.

The Crown and the Courts argues that by proclaiming the supremacy of law in the absence of power, postbiblical thinkers emphasized the centrality of law in the people’s covenant with God, helping to revitalize Jewish life and establish allegiance to legal order. These scholars proved not only creative but also prescient. Their profound ideas about the autonomy of law reverberate to this day.

La Force de Gouverner: Le Pouvoir exécutif en France, XIXe-XXIe Siècles

Au commencement, les régimes politiques modernes visèrent à affaiblir les pouvoirs du gouvernement. En France, les républicains n'euirent de cesse de réduire la puissance du pouvoir exécutif, afin de conjurer l'arbitraire de la monarchie et de l'empire. Aujourd'hui, notre démocratie présidentielle est concentrée autour d'un chef suprême, tenu non plus pour un obstacle à l'expression du peuple mais pour son principal vecteur. Que s'est-il passé ? Des années 1870 aux années 1930, les assemblées ont contrôlé l'essentiel de la confection des lois et ont dominé l'action du gouvernement, dans une continuité stable, grâce notamment à l'initiative des commissions, alors que se succédaient les cabinets. On doit à cette République du Parlement, donc du débat et du compromis, le substrat qui nous régit encore : laïcité, libertés publiques (presse, réunion, syndicats, associations), système moderne de l'enseignement public, protection sociale. La conduite de la guerre devenue mondiale et le combat contre la crise économique majeure de 1929 instillent à droite comme à gauche l'idée d'un exécutif fort, clé de voûte constitutionnel. Depuis la Ve république, l'exécutif décide des lois et de leur instabilité car il en change selon sa couleur politique, et limite la discussion parlementaire qui n'inspire plus l'esprit du régime. D'où le paradoxe qu'analyse Nicolas Rousselier dans ce grand livre : les juristes se gargarisent d'une "tradition républicaine", une vue de l'esprit puisque la logique du régime actuel est l'exact opposé de l'ancien esprit républicain. Historiquement parlant, il n'y a pas eu une République mais deux et contrairement à d'autres pays, la France n'a pas su mener à bien la modernisation du pouvoir gouvernemental tout en préservant une tradition parlementaire : elle est passée d'un déséquilibre institutionnel à un autre. Chaque jour, elle en paie politiquement le prix fort.

Contract Law
This compact, comprehensive reference guide covers workers’ compensation and employee protection laws, stressing the rights and duties of both the employer and the employee in the workplace. The text pays special attention to the laws that protect the employee and answers the most common workers’ compensation questions asked by students and lawyers. It is ideal both for use as a student study aid or review for the practitioner. Since the last edition, important U.S. Supreme Court cases have taken into account, statutes and reference materials have been updated, including the new rights and remedies granted to veterans in 2022, and COVID-19’s impact on workers’ compensation has been recognized.

The UK Tax System: An Introduction

This book provides a guide to the structure of the UK tax system, the interaction between UK and EU law, and its application to various classes of taxpayer, as well as explaining the roles of the government departments who administer it and the full range of taxpayers rights and obligations. The fourth edition has been revised to cover the consequences of leaving the EU for the UK tax system and changes in loss and group relief rules.

Gender Perspectives in Private Law
This book discusses prominent and controversial gender-related issues across the fields of family law, tort law, labour law, civil procedure law, ADR and private international law. An important critical assumption made by the authors is that the gender equality perspective has been largely neglected in several branches of private law, since scholars researching the intersection between gender and legal studies are mostly focused on public law and human rights law. In light of that, the book contributes not only to the deconstruction of gender-blind private law, but also to the development of a gender-competent analysis of the key branches of private law, starting with private international law. Gender perspective in family law is analyzed on the basis of gendered and heteronormative operations of family law with reference to the formation of legally recognized relationships, the establishment of legal parenthood, the division of marital property after a divorce, and the arrangements for post-separation parenting. Also, regulation of family matters in Indian society and the gender equality perspective from the principle of the child’s best interest are considered.

Link to the book in the catalog: Gender perspectives in private law - האוניברסיטה העברית (exlibrisgroup.com)
Democracy and Sovereignty: Rethinking the Legitimacy of Public International Law

At a time where multilateralism is coming under increasing pressure, a new reflection on the foundations of international law is warranted. Democracy and Sovereignty: Rethinking the Legitimacy of Public International Law addresses urgent new and intrinsically international subject areas, such as digitalization, climate change and transborder investments. This volume looks at the changing role of state sovereignty and explores more democratic modes of legitimation in order to supplement the traditional concept of state consent, and sharpen the notion of democracy itself.

Making Sense of Politics, Media, and Law: Rhetorical Performance as Invention, Creation, Production

Employs a new idea of "making", covering artefaction, crafting, fiction, and fabrication, to make sense of controversies in law, politics, and media, from transgender identity to cancel culture. Brings new perspectives to a range of academic disciplines including law, politics, media, rhetoric, performance, theatre, gender studies and psychology.

Law, Humanities and the COVID Crisis

While there has been an abundance of scientific works on the COVID-19 crisis, there has been relatively little research to date from the humanities. This striking new book seeks to address the immediacy of COVID-19 by focusing on the implications of the virus in a wider interdisciplinary context-through the lens of the law, history, ethics, technology, economics, and gender studies. From Europe to South America, Asia, and beyond, Law, Humanities and the Covid Crisis sets out a framework for understanding the COVID-19 virus beyond its epidemiological constraints, asking us to question the very definition of what it means to be human. Researchers from around the world offer their critical reflections on the past, present, and future of this period of socio-cultural upheaval and the tremendous suffering that has laid bare fundamental imbalances in our society. Featuring essays on public welfare versus private interest, violence against women, mask compliance, conspiracy theories, and national security laws, this book is a significant contribution to understanding our new "post-COVID" landscape, and the future yet to come.

Competition and Intellectual Property Law in Ukraine

This volume provides the most comprehensive contemporary academic writing on Ukrainian competition and intellectual property law in English. Especially over the last few years, these areas have been in considerable flux, a main driver being the EU–Ukraine Association Agreement. The chapters cover a broad range of different topics and share a forward-looking perspective. They also outline the basic background that is necessary to understand the context of the issue discussed, especially with regards to the legal system of Ukraine. The publication is the result of a two-year project, and it is addressed to a wide range of international scholars, practitioners, and policy makers. It aims to make the state-of-the-art in Ukrainian legal scholarship visible and accessible to the international research community and to stimulate global debates in academia and politics. Therefore, it may be of interest and use to anyone who is interested in competition and intellectual property law, and/or in Ukraine.

Data at the Boundaries of European Law

Data at the Boundaries of European Law focuses on the impact of new and existing EU legislation, such as the Data Governance Act, as well as core themes in the relationship between law and the digital world.

Link to the book in the catalog: [Data at the Boundaries of European Law - האוניברסיטה העברית - exlibrisgroup.com](http://exlibrisgroup.com)
Privacy and the Role of International Law in the Digital Age

This book examines the role of international law in securing privacy and data protection in the digital age. Driven mainly by the transnational nature of privacy threats involving private actors as well as States, calls are increasingly made for an ‘international’ privacy framework to meet these challenges. Mapped against a flurry of global privacy initiatives, the book explores the extent to which and whether international law attends to the complexities of upholding digital privacy. It does so in three levels. First, the book interrogates boundaries of international privacy law in upholding privacy and data protection in the digital ecosystem where threats to privacy are increasingly transnational, sophisticated, and privatized. It demonstrates that shackled by a host of normative and structural setbacks, international law offers weak protections to privacy and data protection. Second, the book explores the potential of global privacy initiatives, namely Internet bills of rights, universalization of regional systems of data privacy protection, and the multi-level privacy discourse at the United Nations, in reimagining the normative contours of international privacy law. It finds that none of the global privacy initiatives will effectively address structural shortcomings of international law. Third, the book proposes a pragmatic approach to the international law of privacy that could make it better-equipped in the digital age.

Individual Criminal Responsibility for Autonomous Weapons Systems in International Criminal Law

In this book Barry de Vries addresses the issue of autonomous weapons in international criminal law. The development of autonomous weapon systems is progressing. While the technology advances, attempts to regulate these weapons are not keeping pace. It is therefore likely that these weapons will be developed before a new legal framework is established. Many legal questions still remain and one of the most important ones among them is how individual responsibility will be approached. Barry de Vries therefore considers this issue from a doctrinal international criminal law perspective to determine how the current international criminal law framework will address this topic.

**Vulnerability and Data Protection Law**

Vulnerability has traditionally been viewed through the lens of specific groups of people, such as ethnic minorities, children, the elderly, or people with disabilities. With the rise of digital media, our perceptions of vulnerable groups and individuals have been reshaped as new vulnerabilities and different vulnerable sub-groups of users, consumers, citizens, and data subjects emerge. *Vulnerability and Data Protection Law* not only depicts these problems but offers the reader a detailed investigation of the concept of data subjects and a reconceptualization of the notion of vulnerability within the General Data Protection Regulation. The regulation offers a forward-facing set of tools that—though largely underexplored—are essential in rebalancing power asymmetries and mitigating induced vulnerabilities in the age of artificial intelligence.

International Criminal Law – A Counter-Hegemonic Project?

This book enquires into the counter-hegemonic capacity of international criminal justice. It highlights perspectives and themes that have thus far often been neglected in the scholarship on (critical approaches to) international criminal justice.

Can international criminal justice be viewed as a ‘counter-hegemonic’ project? And if so, under what conditions? In response to these questions, scholars and practitioners from the Global South and North reflect *inter alia* on the engagement with international criminal justice in the context of Ukraine, Palestine, and minorities in South-Asia while also highlighting the hegemonic tendencies built into the institutional structure of the International Criminal Court on the axes of gender and language.

Race and the Law in South Carolina: From Slavery to Jim Crow

This first title in the “Law, Literature & Culture” series uses six legal disputes from the South Carolina courts to illuminate the complex legal history of race in the U.S. South from slavery through Jim Crow. The first two cases—one criminal, one civil—both illuminate the extreme oppressiveness of slavery. The third explores labor relations between newly emancipated Black agricultural workers and white landowners during Reconstruction. The remaining cases investigate three prominent features of the Jim Crow system: segregated schools, racially biased juries, and lynching, respectively. Throughout the century under consideration, South Carolina’s legal system obsessively drew racial lines, always to the detriment of non-white people, but it occasionally provided a public forum within which racial oppression could be challenged. The book emphasizes how dramatically the degree of legal oppressiveness experienced by Black South Carolinians varied during the century under study, based largely on the degree of Black access to political and legal power.

Towards a Conceptual Network for the Private Law of Artificial Intelligence

This book provides a set of proposals for the new conceptual network required in order to establish civil law rules for a world permeated by Artificial Intelligence. These proposals are intended by their authors to push the debate on the new civil law forward. In spite of the natural conservatism of jurists, some innovative or even futuristic ideas are called for, also because the future, even this not-so-distant one, is difficult to foresee. Paradoxically, and unlike in the past, this lack of knowledge must not stop us from planning. If it does, humankind may, as some pessimists already claim, lose its chance to win the battle for control of the world.

The rise and expansion of Artificial Intelligence and robotics in recent years has highlighted a pressing need to create a suitable legal framework for this new phenomenon. The debate on the subject, although wide-ranging and involving many new legal documents, is still quite general and preliminary in nature, although these preparatory works illustrate the very real need to develop appropriate new civil law arrangements. It is exactly the branch of private law where the necessity of these new rules appears to be the most imperative. Autonomous vehicles, medical robots, and expertise software raise fundamental questions on aspects of civil liability such as culpability; whereas the growth in popularity of automated, intelligent software systems for concluding contracts requires a new approach to many fundamental and deeply rooted elements of contract law, e.g. consciousness, intent, error, deception, interpretation of contracts and good faith.

Humanistic Foundation of Criminal Law

This book uses humanity-rationality and experience and the freedom of human will as a theoretical perspective to examine the basic framework of criminal law theories constructed by the criminal classic school and the criminal empirical school. The author puts forward the principle of the duality of rationality and experience of humanity and affirms the determinism of human behavior in the ontological sense and the freedom of will in the axiological sense. From this point of view, this book examines the humanistic foundations of crime and punishment, legislation and justice.

Link to the book in the catalog: Humanistic foundation of criminal law - האוניברסיטה העברית ירושלים - jexlibrisgroup.com)
The book analyses the role and responsibility of states for addressing ‘modern slavery’—a diverse set of practices usually perpetrated by non-state actors—against the backdrop of international human rights law. In doing so it explores the dynamic and cross-pollination between criminal law and human rights law, revealing the differences in the ways these legal domains work to secure justice for victims. The book considers the ‘absolute’ nature of the prohibition of ‘modern slavery’ in human rights law, the range of practices covered by this umbrella term, and their mutual relationships, positive obligations of states established by international human rights tribunals owed to individuals subject to ‘modern slavery’, and standards for assessing state responsibility in these situations. By engaging with the concept of exploitation in human rights law, which glues together diverse practices of ‘modern slavery’ into a coherent concept, the book elucidates the theoretical foundations of this fundamental human right and explains why human trafficking has an independent place within it. In addition to providing a comprehensive account and critique of the existing human rights jurisprudence, the book offers a roadmap for the future development of law on this subject, emphasising the limits of human rights law as a tool for addressing ‘modern slavery’.

**Link to the book in the catalog:** [State responsibility for 'modern slavery' in human rights law : a right not to be trafficked](exlibrisgroup.com)
Blue Planet Law: The Ecology of Our Economic and Technological World

Blue Planet Law is the global and future-oriented environmental law that is necessary to face the global environmental crisis in the Anthropocene, assuming especially the link between climate action (SDG 13) and ocean sustainability (SDG 14). This open access book focuses on means of overcoming global environmental problems such as climate change, ocean degradation and biodiversity loss and the consequent risks for human life, health, food and wellbeing. It explores how environmental law, at the international, European and national levels, might set economic and technological development on a more sustainable path. Law must engage in dialogue with other areas such as philosophy, economics, ecology, and biology. This book highlights protection of the climate and the oceans and sustainable use of natural resources, through new policies, economies and technologies, including biotechnology, with a view to the preservation of life, health, food and a healthy environment for the present and future generations.

Link to the book in the catalog: Blue Planet Law The Ecology of our Economic and Technological World - (http://exlibrisgroup.com)
Portraits of Women in International Law: New Names and Forgotten Faces?

This fascinating volume offers a set of biographies of women and gender non-conforming people who made a difference in international law but who, in most cases, were never well-known or have been forgotten. These portraits describe each individual's engagement with international law, the context in which they worked, and the barriers they faced.

Data Disclosure: Global Developments and Perspectives

Data has become a key factor for the competitiveness of private and state actors alike. Personal data in particular fuels manifold corresponding data ecosystems – in many cases based on the disclosure decision of an individual. This volume presents the proceedings of the bidt "Vectors of Data Disclosure" conference held in Munich 2022. The contributions give comparative insights into the data disclosure process – combining perspectives of law, cultural studies, and business information systems. The authors thereby tackle the question in which way regulation and cultural settings shape (or do not shape) respective decisions in different parts of the world. The volume also includes interim results of the corresponding bidt research project – including in-depth reports covering the regulatory and cultural dimensions of data disclosure in eight different countries / regions worldwide, a business information systems model of the disclosure decision process, and empirical studies.

Link to the book in the catalog: Data Disclosure : Global Developments and Perspectives - (האוניברסיטה העברית בירושלים וברשלím) nexlibrisgroup.com)
More Equal than Others? Perspectives on Principle of Equality from International and EU Law

This book analyses the principle of equality from three perspectives: public international law, private international law and EU law. It is the first book in English providing a comprehensive overview of this principle in these areas of law and showing the current trends and issues concerning its application. Its main goal is to understand whether and to what extent the principle of equality has been affirmed in public and private international law, as well as EU law, and what – if any – the common core of this principle is. The analysis carried out in this contributed volume starts from general analyses of the principle of equality in the areas of the law covered by the book and then discusses the principle in more specific areas, such as human rights law, international adjudication (including investment law) and the law of international organizations.

Link to the book in the catalog: More Equal than Others? Perspectives on the Principle of Equality from International and EU Law - (librisgroup.com)
Design Evolution and the Law: Protecting Product Designs Today and Tomorrow

This book focuses on product design which is evolving conceptually and practically with advances in technology. Product design is no longer solely about product stylization and decoration, but rather about providing a holistic product experience for the consumer. Therefore, in the foreseeable future, product designs will increasingly communicate not only to our eyes, but to our other senses as well. This book examines the frameworks for the protection of product designs in New Zealand and Australia and evaluates the appropriateness of expanding legal mechanisms for the accommodation of product design evolution. The value of more holistic design protection is balanced against other important considerations such as the "right to repair". The book not only anticipates the extent to which product design will cater to senses other than visual, but also provides a novel framework (with reference to industry examples) for discerning originality in such work for the purposes of copyright. This book also makes suggestions for how designs can be protected from foreseeable infringement (analogous to copyright infringement of music and movies on file sharing networks) resulting from future advances in technologies such as 3D printing and virtual reality.

Link to the book in the catalog: Design evolution and the law: protecting product designs today and tomorrow - (האוניברסיטה העברית בירושלים - ) exlibrisgroup.com)
On Transits and Transitions: Trans Migrants and U.S. Immigration Law

Celebrations of the "transgender tipping point" in the second decade of the twenty-first century occurred at the same time of heightened debates and anxieties about immigration in the United States. On Transits and Transitions explores what the increased visibility of trans people in the public sphere means for trans migrants and provides a counter-narrative to the dominant discourse that the inclusion of transgender issues in law and policy represents the progression of legal equality for trans communities. Focusing on the intersection of immigration and trans rights, Josephson presents a careful and innovative examination of the processes by which the category of transgender is produced through and incorporated into the key areas of asylum law, marriage and immigration law, and immigration detention policies. Using mobility as a critical lens, On Transits and Transitions captures the insecurity and precarity created by U.S. immigration control and related processes of racialization to show how im/mobility conditions citizenship and national belonging for trans migrants in the United States.

Link to the book in the catalog: On transits and transitions : trans migrants and U.S. immigration law -
The American Law Institute: A Centennial History

The American Law Institute is the preeminent legal reform organisation in the United States and its centennial is a landmark event. This book brings together an outstanding group of expert scholars to provide an in-depth scholarly history of the ALI, its role in legal reform, and the various ways it has impacted law in the United States.

**Link to the book in the catalog:** The American Law Institute : A Centennial History. - [exlibrisgroup.com](http://exlibrisgroup.com)
Religious Accommodation and its Limits

This book proposes an original model of religious accommodation which can be applied in secular liberal democracies where religious diversity has been a hotly contested issue.Addressing the complex question of limitations to the right to Freedom of Religion or Belief and how these limitations might be determined, it examines how religious claims can harm the autonomy of others and emphasises the need for an appropriate balancing of competing interests. Drawing on a range of case study examples from jurisdictions including the US, Canada, the European Court of Human Rights, the European Union's Court of Justice, the UK, Germany and France, this is a timely contribution to the debate on how a legal duty or policy approach in favour of religious accommodation can be applied in practice. Moreover, the proposed model offers criteria that may be used to guide the implementation of equality and diversity policies in contexts such as employment and education.

Link to the book in the catalog: Religious accommodation and its limits - Hebrew University of Jerusalem (exlibrisgroup.com)
Grandparents and the Law: Rights and Relationships

Should grandparents have rights in relation to their grandchildren? If so, what should the content of those rights be, both procedurally and substantively? And what is the appropriate role of the law in providing solutions to problems arising in the context of grandparents' rights? This book considers these questions from both a public and a private law perspective, and analyses the human rights implications for parties such as children, parents and grandparents. It also explores the topic of grandparents' rights in the context of the European Convention on Human Rights and the United Nations Convention on the Rights of the Child, as well as in other jurisdictions, such as Iran, France and Nepal. The book argues that grandparents' rights have so far received insufficient acknowledgment and, consequently, that relationships between grandparents and grandchildren have received insufficient protection. However, it is crucial that the protection of grandparents' rights is balanced with the rights of parents and the rights and welfare of children; the book considers how best to achieve this, for example in disputes on child arrangements (i.e. residence and contact), child protection matters and in adoption cases.

Link to the book in the catalog: [Grandparents and the Law: Rights and Relationships](Hebrew University of Jerusalem (exlibrisgroup.com))
Landmark Cases in Private International Law

This collection of essays contains in-depth analyses of eighteen landmark cases in private international law, from Penn v Lord Baltimore in 1750 to Brownlie v FS Cairo (Nile Plaza) LLC in 2021. The contributors are experts drawn from academia and practice as well as from the bench. Case law has been a central driver in the legal development of the English conflict of laws. Judge-made law does not just supply a source of law itself but also acts as the crucible in which other sources of law – legislation, international Treaty, European regulation, and ideas generated by jurists such as Joseph Story and Albert Venn Dicey – have been tested and applied. This book sheds new light on the past and future evolution of private international law by focusing on the landmark cases which have fundamentally shaped the way that we think about this subject. The focus is on the English common law, but landmarks in Scotland, Australia and Canada are covered as well. Many of them concern disputes between commercial parties; others deal with issues such as marriage and domicile; and some arise from controversies in political, constitutional and international affairs. The landmark cases tackled in this collection address significant issues in civil jurisdiction, governing law, foreign judgments, and public policy. The essays place those landmarks in their historical context, explain their contemporary importance, and consider their future relevance.

Link to the book in the catalog: Landmark Cases in Private International Law - Hebrew University of Jerusalem (exlibrisgroup.com)
Wordly Politics and Divine Institutions: Contemporary Entanglements of Faith and Government

Wordly Politics and Divine Institutions explores the entanglement of religion and government in a comparative, case-based analysis of several major court cases from the European Court of Human Rights, the U.S. Supreme Court, and the Supreme Court of the U.K. The entanglement of religion and state is prevalent in many democratic countries however it is understudied. Worldly Politics and Divine Institutions aims to fill this blind spot. Categories and cases such as discrimination conducted by governmentally funded religious associations and the governmental endorsement of religious symbols in public spaces create hybrid institutions, that are difficult to analyse, compare and manage. The structuring of an adequate, novel framework of analysis and comparison is one core goal of Worldly Politics and Divine Institutions.

The Oxford Handbook on Atrocity Crimes

*The Oxford Handbook on Atrocity Crimes* surveys and further develops the evolving field of atrocity crimes studies by combining major mono-, inter-, and multi-disciplinary research on atrocity crimes in one comprehensive volume. With contributions of leading scholars, this handbook will be an essential source and reference tool. Unique in its thematic focus (atrocity crimes as an overarching phenomenon, including crimes of genocide, crimes against humanity, and war crimes) as well as in its comprehensive scope, the book covers the etiology, the actors involved, the harm caused, the reactions to atrocity crimes, and in-depth analyses of understudied situations of war crimes, crimes against humanity, and genocide.

A Cultural History of Law in Antiquity

How should we talk about “the law” in a period so remote from our own and covering such a huge span of time and space? From the Code of Hammurabi (ca. 1750 BCE) to Justinian’s Corpus Iuris Civilis (529-534 CE), A Cultural History of Law in Antiquity draws upon legal texts and non-textual forms (such as vase-painting, sculpture, and architecture) to uncover the diverse and rich legal traditions of societies ranging from the Ancient Near Eastern cities of Assyria and Babylon in Mesopotamia to the Ancient Israelites, and from Ancient Greece to Rome of the Archaic and Classical Periods.

Link to the book in the catalog: A cultural history of law - \(\text{lexlibrisgroup.com}\)
A Cultural History of Law in Middle Ages

In 500, the legal order in Europe was structured around ancient customs, social practices and feudal values. By 1500, the effects of demographic change, new methods of farming and economic expansion had transformed the social and political landscape and had wrought radical change upon legal practices and systems throughout Western Europe. A Cultural History of Law in the Middle Ages explores this change and the rich and varied encounters between Christianity and Roman legal thought which shaped the period. Evolving from a combination of religious norms, local customs, secular legislations, and Roman jurisprudence, medieval law came to define an order that promoted new forms of individual and social representation, fostered the political renewal that heralded the transition from feudalism to the Early Modern state and contributed to the diffusion of a common legal language.

Link to the book in the catalog: A cultural history of law - (exlibrisgroup.com)
A Cultural History of Law in the Early Modern Age

Opened up by the revival of Classical thought but riven by the violence of the Reformation and Counter Reformation, the terrain of Early Modern law was constantly shifting. The age of expansion saw unparalleled degrees of internal and external exploration and colonization, accompanied by the advance of science and the growing power of knowledge. *A Cultural History of Law in the Early Modern Age*, covering the period from 1500 to 1680, explores the war of jurisdictions and the slow and contested emergence of national legal traditions in continental Europe and in Britannia. Most particularly, the chapters examine the European quality of the Western legal traditions and seek to link the political project of Anglican common law, the *mos britannicus*, to its classical European language and context.

Link to the book in the catalog: A cultural history of law - (exlibrisgroup.com)
A Cultural History of Law in the Age of Enlightenment

The period of the Enlightenment was marked by innovation in political, cultural, religious, and educational ideas with the aim of improving the experience of human beings in society. Key to intellectual debates and day-to-day life were ideas about the law. Many looked to Britain, and to the British, as exemplars of a state governed by moderate laws under a moderate constitution. Britain's laws and constitution were portrayed and satirized in almost every artistic medium. *A Cultural History of Law in the Age of Enlightenment* presents essays spanning the “long 18th century” (1680 to 1820) which explore the place of law in a range of creative and artistic media, all of which flourished in a commercial society with law at its center and enlightenment as its aim.

The Age of Reform – the hundred years from 1820 to 1920 - has become synonymous with innovation and change but this period was also in many ways a deeply conservative and cautious one. With reform came reaction and revolution and this was as true of the law as it was of literature, art and technology. The age of Great Exhibitions and Great Reform Acts was also the age of newly systemized police forces, courts and prisons. A Cultural History of Law in the Age of Reform presents an overview of the period with a focus on human stories located in the crush between legal formality and social reform: the newly uniformed police, criminal mugshots, judge and jury, the shame of child labor, and the need for neighborliness in the crowded urban and increasingly industrial landscapes of Europe and the United States.

A Cultural History of Law in the Modern Age

The period since the First World War has been a century distinguished by the loss of any unitary foundation for truth, ethics, and the legitimate authority of law. With the emergence of radical pluralism, law has become the site of extraordinary creativity and, on occasion, a source of rights for those historically excluded from its protection. A Cultural History of Law in the Modern Age tells stories of human struggles in the face of state authority – including Aboriginal land claims, popular resistance to corporate power, and the inter-generational ramifications of genocidal state violence. The essays address how, and with what effects, different expressive modes (ceremonial dance, live street theater, the acoustics of radio, the affective range of film, to name a few) help to construct, memorialize, and disseminate political and legal meaning.

Extraterritoriality

Extraterritoriality is a challenging concept as a matter of international law and policy, raising fundamental questions about the allocation of power among States. It is also a dynamic concept, reflecting and responding to shifts in the global economy, patterns of human behavior, and understandings of state sovereignty. This volume explores extraterritoriality from a wide range of perspectives—theoretical, historical, and empirical. Its chapters likewise address a wide range of practices, in areas including criminal law, economic regulation, and the protection of human rights. Throughout, the volume recognizes extraterritoriality as an expansive concept used to assess both the actions and the obligations of states within the international arena.

Handbook of ICC Arbitration: Commentary and Materials

The main focus of the fifth edition is the application of the amendments to the ICC Rules in 2017 and the introduction of several new provisions in 2021, both under the aegis of Alexis Mourre as President of the ICC Court. These include in particular, the application of Article 29 with respect to emergency arbitrators introduced in 2012 as well as the application of Article 30 with respect to expedited procedures introduced in 2017. In addition in 2021, was another welcome addition to the ICC Rules in Article 43 which provides that claims against the ICC are subject to French law and to the Paris Judicial Tribunal.

The Tree of Legal Knowledge: Imagining Blackstone’s Commentaries

This book restores to view a masterpiece of beauty and legal scholarship, which has been lost for almost two hundred years. Produced anonymously in 1838, The Tree of Legal Knowledge is an elaborate visualization in five large colored plates of the law as stated in Sir William Blackstone’s Commentaries on the Laws of England. Although Blackstone’s Commentaries had been first published eighty years earlier, it remained the primary source for knowledge of English law and required reading for American law students. The Commentaries remain relevant today and are frequently cited by the U.S. Supreme Court as a source for the original understanding of legal rights and obligations at the time of American Independence.

The present volume reproduces the only extant copy of The Tree of Legal Knowledge. It includes an introduction by the editor that places The Tree in historical context and identifies the anonymous author, an otherwise unknown lawyer. In addition, it reprints the original author’s introduction and “explanation of the branches,” both extensively annotated. This book restores this lost masterpiece to its proper place in legal history. The Tree is a beautiful—and accurate—depiction of English law as expounded in Blackstone’s Commentaries, the single most important book in the history of the common law.

Law and Economics of the Digital Transformation

This book pursues the questions from a broad range of law and economics perspectives. Digital transformation leads to economic and social change, bringing with it both opportunities and risks. This raises questions of the extent to which existent legal frameworks are still sufficient and whether there is a need for new or additional regulation in the affected areas: new demands are made on the law and jurisprudence.

Nothing More than Freedom: The Failure of Abolition in American Law

Nothing More than Freedom explores the long and complex legal history of Black freedom in the United States. From the ratification of the Thirteenth Amendment in 1865 until the end of Reconstruction in 1877, supreme courts in former slave states decided approximately 700 lawsuits associated with the struggle for Black freedom and equal citizenship. This litigation – the majority through private law – triggered questions about American liberty and reassessed the nation’s legal and political order following the Civil War. Judicial decisions set the terms of debates about racial identity, civil rights, and national belonging, and established that slavery, as a legal institution and social practice, remained actionable in American law well after its ostensible demise. The verdicts determined how unresolved facets of slavery would undercut ongoing efforts for abolition and the realization of equality. Insightful and compelling, this work makes an important intervention in the history of post-Civil War law.

Students and established scholars of intellectual property law often look for historical context when trying to understand the development and present-day contours of IP rules and systems. American Patent Law supplies this context, offering readers a comprehensive account of the evolution of the US patent system and patent doctrine beginning in 1790. From the technologies for harvesting wood and shoemaking in the earliest periods to computer software and biotechnology of the present, each chapter of the book covers the characteristic technologies of each historical era. The book also describes how businesspeople in each era acquired and enforced patents and used patents as the foundation of various business arrangements. This book is a landmark in the history of technologies, the US patent system, and the way private actors have deployed patents across American history.

• Explains trends in technology, business organization, and finance, and how they relate to the changing shape of patent institutions and legal rules
• Situate patent-related developments in the context of overall economic and business trends in the United States
• Includes in-depth descriptions of many specific inventions, the industry they came from, and the inventors and businesspeople who were involved with them

After Misogyny: How the Law Fails Women and What to Do about it.

Just as racism is embedded in the legal system, so is misogyny—even after the law proclaims gender equality and criminally punishes violence against women. In After Misogyny, Julie C. Suk shows that misogyny lies not in animus but in the overempowerment of men and the overentitlement of society to women's unpaid labor and undervalued contributions. This is a book about misogyny without misogynists. From antidiscrimination law to abortion bans, the law fails women by keeping society's dependence on women's sacrifices invisible. Via a tour of constitutional change around the world, After Misogyny shows how to remake constitutional democracy. Women across the globe are going beyond the antidiscrimination paradigm of American legal feminism and fundamentally resetting baseline norms and entitlements. That process, what Suk calls a "constitutionalism of care," builds the public infrastructure that women's reproductive work has long made possible for free.

Law, Surveillance and the Humanities

The growing sophistication of surveillance practices has given rise to concerns and discussions in the public sphere, but has also provided a popular theme in literature, film and the arts. Bringing together contributors across literary studies, law, philosophy, sociology, and politics, this book examines the use, evolution, legitimacy, and implications of surveillance.

Drawing on a range of resources including literary texts, chapters explore key issues such as the use and legitimacy of surveillance to address a global health crisis, the role of surveillance in the experience of indigenous peoples in post-colonial societies, how surveillance interacts with gender race, ethnicity, and social class, and the interaction between technology, surveillance, and changing attitudes to expression. It shows how literature contributes innovative ways of thinking about the challenges posed by surveillance, how philosophy and sociology can help to correct biases and law and politics can offer new approaches to the legitimacy, use and implications of surveillance.

Essentially a Mother: A Feminist Approach to the Law of Pregnancy and Motherhood

*Essentially a Mother* argues that the law of pregnancy and motherhood has been overrun by sexist ideology. Courts have held that a pregnant woman’s nine months of gestation hardly count in her claim to parent the child she bears and that a man’s brief moment of ejaculation matters more than a woman’s labor. Armed with such dubious arguments, courts have stripped women of the right to abortion, treated surrogate mothers as mere vessels, and handed biological fathers—even those who became fathers through rape—automatic rights over women and their children. In this incisive and groundbreaking book, Jennifer Hendricks argues that feminists must overthrow the skewed value system that subordinates women, devalues caregiving, and denies too many the right to parent.

The Hebrew University of Jerusalem: Theoretical and Practical Aspects of Judicial Review: Articles and Essays in Memory of Eliezer Goldberg

Theoretical and Practical Aspects of Judicial Review: Articles and Essays in Memory of Eliezer Goldberg

The articles and essays in this volume explore various aspects of judicial review in different contexts, emphasizing the role of judges and lawyers in the application of laws and the protection of human rights.

The book includes essays on the functional role of judges in the democratic process, the importance of independence and accountability of the judiciary, the role of international courts, and the protection of human rights.

The essays also address specific issues such as the role of judges in the enforcement of human rights, the relationship between the judiciary and other branches of government, and the impact of judicial review on the democratic process.

The volume is a valuable resource for law students, legal practitioners, and anyone interested in the role of the judiciary in a democratic society.
